Work Experience

JetBrains , Research Intern in HoTT and Dependent Types Lab	Remote
• Developed AI features for the Arend language including MCP servers for typechecking, IDE integration. Contributed to the Arend plugin in IntelliJ IDEA. • Developed an experimental LLM coding agent for writing Arend code using framework Koog. • Fine-tuned models for Arend code completion.	Nov 2025 – Apr 2026
JetBrains , Research Intern in HoTT and Dependent Types Lab	Pafos, Cyprus
• I was developing the official library in the Arend language. I formalized different results in algebra and homotopy type theory, including following. • Formalized Eckmann-Hilton argument, Eilenberg-MacLane spaces, Homologies of types. • Formalized automorphisms of groups, Schur's Lemma, Maschke's Lemma, Group actions characterizations. (Some of these results are in the 1.10 release ↗).	June 2024 – Sept 2024
IPONWEB (acquired by Criteo) , Machine Learning Intern	Pafos, Cyprus
• Criteo has a ML tool that analyzes sites and produces word2vec representations. Reverse-engineered the behaviour of this tool and analyzed its possible applications.	May 2023 – Sept 2023
