Profile

Mathematician and research engineer building proof-assistant tooling and AI systems for formal mathematics. My experience spans typechecker development, IDE integrations, formalization, and original mathematical research.

Technical Skills

- **Formal methods and mathematics:** category theory, homotopy type theory, dependent type theory, proof assistants, theorem proving, formalization.
- **Programming and language tooling:** Kotlin, Python, Java, SQL, Haskell; typechecking, compiler-style tooling, IntelliJ Platform.
- **AI engineering:** MCP, LLM coding agents, model fine-tuning, code completion, evaluation.
- **Languages:** Russian (native), English C1 (IELTS 8.0/9), French (conversational).

Education

MSc	University of Geneva , Mathematics	2025 – 2027
BSc	Saint Petersburg State University , Mathematics	2021 – 2025
BSc	Neapolis University Pafos , Applied Computer Science, JetBrains Program	2022 – 2024

Work Experience

JetBrains , Research Intern in HoTT and Dependent Types Lab	Remote
• Developed an MCP server for the Arend proof assistant, exposing typechecking and IDE functionality to LLM coding agents. • Integrated the server with the Arend plugin for IntelliJ IDEA and contributed plugin changes. • Built an experimental LLM coding agent for Arend using Koog; fine-tuned models for Arend code completion.	Nov 2025 – Apr 2026
JetBrains , Research Intern in HoTT and Dependent Types Lab	Pafos, Cyprus
• Contributed formalized results in algebra and homotopy type theory to the official Arend library. • Formalized the Eckmann-Hilton argument, Eilenberg-MacLane spaces, homology of types, group automorphisms, Schur's Lemma, Maschke's Lemma, and characterizations of group actions; selected work shipped in Arend 1.10.	June 2024 – Sept 2024
IPONWEB (acquired by Criteo) , Machine Learning Intern	Pafos, Cyprus
• Reverse-engineered a Criteo ML system that analyzes websites and produces word2vec representations; evaluated potential applications.	May 2023 – Sept 2023

Research and Engineering

Rzk proof assistant and sHoTT library	Open source
• Contribute to an experimental proof assistant for synthetic infinity-categories across its Haskell typechecker and Rzk formalization library. • Implemented identity-type inference from either endpoint, expanded error diagnostics, and added regression tests in an open pull request. • Formalized that precomposition with an equivalence is an equivalence in the sHoTT library.	Aug 2026 – present
The operad associated to a crossed simplicial group	Dec 2025

AI-Assisted Mathematical Research

- [An explicit non-elementary matrix over a bivariate Laurent polynomial ring](#) [↗](#) - Vasiliy Ionin, **Artem Semidetnov** (Sept 2026).
- [On Some More Problems from the Kourouka Notebook](#) [↗](#) - Vasily Ionin, **Artem Semidetnov** (Aug 2026).
- [The stable commutator length of a relator is not a one-relator group invariant](#) [↗](#) - **Artem Semidetnov** (Aug 2026).

Research Interests

- Categorical homotopy theory; homotopy type theory and computer-verified mathematics; simplicial methods and operads; AI-assisted mathematical reasoning; geometric and combinatorial group theory.

Awards and Selected Activities

Excellence Master Fellowship at the University of Geneva [↗](#)

JetBrains Scholarship at Neapolis University Pafos

Funded participant at [Teaching Higher Category Theory with Computers](#) [↗](#), ICERM, Brown University, 2026.

Selected Talks

The operad associated to a crossed simplicial group [↗](#)

July 2026

- Young Topologists Meeting 2026, Copenhagen

Plus construction and simplicial methods [↗](#)

Aug 2025

- Algebraic Topology, Geometry, Combinatorics, and Data Analysis, Pushkin

Twisting numbers on braid and Thompson groups [↗](#)

2024

- Topological Methods in Dynamics and Related Topics VII, Nizhny Novgorod
